CTE Course Assistance for Teachers

CRACTC/RACTC/GNWACTC would like to offer assistance to CTE teachers. Below is a list of our current course offerings in which we have courses that our teachers developed and provide in an online modality.

Different LMS systems are utilized for different courses (i.e. Moodle, Google Classroom, Blackboard) and that is listed within the attached spreadsheet. Your teachers can utilize this information as a guide to develop their own online content, resources, strategies as they wish. We also encourage you to email the course teacher listed on the spreadsheet to discuss ideas, strategies, etc. as a professional learning opportunity.

For the **Moodle** courses, any teachers teaching the same class and would like access to "copies" of the course that we provide, please send an email to me and our IT Coordinator, Jason Horner (jason_horner@bismarckschools.org), with the course you would like access to. Jason will email you the site link, Moodle username/password, and some videos of tutorials regarding Moodle (i.e. Quick Guide, Navigation, Finding you way around, Etc.). You will have access to the requested courses for the remainder of this school year. If a teacher wants to utilize the copied shell "as is" with their students, please contact Jason Horner directly at the email provided above.

For the courses taught in Blackboard or Google Classroom, we have asked our teachers that utilize those platforms to share content, resources, etc. so other teachers may utilize within an online platform of their choice.

Please realize some courses may have content site licenses with some external vendor content as part of the class, of which, unfortunately we cannot provide access to.

Additionally, there are several resources that our online teachers are using or have used over the years (see below) to assist student engagement/learning strategies. Again, please feel free to contact the listed teachers if you have questions about tools/resources/strategies they use.

Videoconferencing: Zoom, Microsoft Teams, Skype, etc.
Recording: Youtube, VoiceThread, FlipGrid, Padlet, etc
Review/poll/quizzes: Kahoot, Quizlet, GimKit, Socrative, etc.
Others: Google Drive, Thinglink, etc.

Please realize this intellectual property and content has taken many days and/or years to compile, organize, etc. by our program teachers. Once you have access, we ask that you use it with professional intent for your local students only and do not share with others outside your local school district without connecting with CRACTC/RACTC/GNWACTC directly. Thank you.

If you need technical assistance or have questions regarding Moodle, Jason Horner (jason_horner@bismarckschools.org) has offered to provide assistance as able, therefore please contact him directly.

As well, please feel free to contact Kevin (Kevin.Nelson@k12.nd.us), Kim (Kim.Murphy@k12.nd.us), me (lyle.krueger@k12.nd.us) if you have other specific questions.

Best of luck as we work through these circumstances together!

Lyle, Kevin, Kim
